- Project selection support prior to first day of class
- Courses led by certified Master Black Belt and top rated instructor
- Extensive experience in over 25 countries with leading corporations
- Outstanding course material integrating new methods with a “Lean Option”
- SixSigma.us certification process included in course cost
- Our low overhead allows for exceptional consultants at a reasonable cost

Six Sigma Highlights

- Detailed course notes with screen shots and step by step instructions
- Access to course leader with extensive project experience
- Project consulting support during each week of training
- Training certificate after completion of training
- **Black Belt** certification after acceptance of project

Previously trained as a Green Belt?

We accept registration in our Black Belt class from people who have been trained by other providers in any credible Green Belt program. An acceptable Green Belt program typically consists of two weeks of classroom training with associated project work, however we will be glad to consider other approaches. Please contact us for details.

After attending this training, participants will be able to:

- Apply advanced statistical tools and work with data of different types and distributions
- Apply different types of Experiments
- Determine sample size needed for experiments
- Apply the different types of optimization and how it affects processes
